

Shariff Sarip-Abidinsa, CAMSsbinsari@andrew.cmu.edu | +1 (412) 330-0121 | LinkedIn: <https://www.linkedin.com/in/shariffsarip>**PROFESSIONAL SUMMARY**

Senior Data Scientist with 6+ years of experience designing and deploying AI-driven analytics and machine learning solutions in a central banking and financial regulatory environment. Proven track record delivering anomaly detection, time-series forecasting, computer vision, and RAG-based systems to improve supervisory effectiveness and productivity. Experienced in stakeholder engagement with senior management and international bodies. Recipient of BIS awards and currently pursuing a Master of Information Systems Management at Carnegie Mellon University.

PROFESSIONAL EXPERIENCE**Bank Negara Malaysia (The Central Bank of Malaysia)****Kuala Lumpur, Malaysia****Senior Data Scientist****September 2020 – present**

- Led the design and enhancement of a spatial-temporal anomaly detection system using weakly-supervised learning, resulting in ~10% improvement in detection of non-compliance among FinTech entities.
- Improved detection of misreported regulatory statistics using time-series forecasting techniques, increasing the reliability of data used for official analyses by internal and external stakeholders.
- Led a data catalog and collection expansion initiative by engaging senior management, surveying 200+ regulated data providers, collaborating with database administrators, and upgrading database specifications to improve data granularity for financial crime surveillance (fraud, AML, and terrorism financing).
- Designed and implemented computer vision workflows using pre-trained object detection models to identify suspicious activity in CCTV footage, reducing manual human review time by over ~50%.
- Developed and presented an AI-powered regulatory productivity solution to senior leaders as a top 5 finalist at the BIS Analytics Challenge 2025, and co-winner of [Best Paper](#) at the BIS IFC Central Bank Statistics Conference 2024.

Etiqa Insurance Singapore**Singapore City, Singapore****Data Analyst****March 2020 – August 2020**

- Independently developed predictive models that improved product performance and marketing outcomes by over ~30% within six months.
- Strengthened data analytics capabilities by implementing machine-learning-based missing-value imputation, enabling more robust downstream analyses.
- Developed automated statistical dashboards and daily analytics reports used by management and the management committee to support data-driven decision-making.

The Center of Applied Data Science**Kuala Lumpur, Malaysia****Data Scientist****March 2019 – February 2020**

- Delivered corporate training in statistics, data strategy, and machine learning to 500+ enterprise participants, enabling practical adoption of analytics in daily operations.
- Designed customized analytics training curricula aligned with client-specific business requirements.
- Supported digital transformation initiatives by applying machine learning to business problems across transportation, education, and telecommunications sectors.

PROJECTS**Machine Learning for Anomaly Detection in Money Services Businesses**

- Implemented a weakly-supervised learning framework leveraging geolocation data to improve workflows for suspicious activity flagging.

Retrieval-Augmented Generation (RAG) Chatbot

- Designed and deployed a RAG-based chatbot integrated with Microsoft Teams, improving internal knowledge retrieval and increasing user productivity by ~50%.

SKILLS**Programming:** Python (packages: numpy, pandas, scikit-learn), Java, R, SQL, Cypher**Data Visualization:** Power BI, Tableau, Qlik Sense**Languages:** English (fluent) & Malay (native)**EDUCATION****Carnegie Mellon University****Pittsburgh, PA***Master of Information Systems Management (GPA: 3.93/4.00)***August 2025 – August 2026***Concentration: Business Intelligence and Data Analytics***University of Wisconsin-Madison****Madison, WI***Bachelor of Science – Mathematics (Concentration: Actuarial Mathematics)***August 2015 – May 2018****CERTIFICATIONS & AWARDS**

- Certified anti-money laundering specialist (CAMS) by ACAMS.
- Co-winner of "Young Statistician Award 2024" awarded by the Bank for International Settlements (BIS).
- Top 5 finalist of BIS Analytics Challenge 2025 (worked on AI-powered compliance check prototype).
- Recipient of full-ride scholarships from the government of Malaysia and the Central Bank of Malaysia.
